INSPIRED DECORATING TECHNIQUES

At STORMTECH we offer a comprehensive array of in-house decoration techniques to present your brand artwork on our premium apparel, bags, and accessories. We meticulously test each decoration technique on every product to ensure we recommend the most suitable method for each individual product.

Our team of decoration experts are happy to assist you to choose the best technique, and can provide client-friendly virtual samples and artwork proofs to make it easy.

Reach out to a STORMTECH decoration expert today.

EMBROIDERY

Evolved from artisan handwork to high-speed, multi-head computerized machines, embroidery is a high-density, decorative stitching technique suitable for most fabric types.

At STORMTECH, our expert staff use state-of-the-art digitizing software tools, embroidery machines, and best-in-class threads to apply embroidery on a wide range of apparel, bags and accessories.

HEAT TRANSFER

Heat Transfer is a technique where logos are digitally printed onto transfer paper. The logo on the heat transfer paper is then transferred onto a substrate using heat and pressure. This high quality, full-colour heat transfer technology allows for high definition detail - including free-standing text - and has superior adhesion and durability.

SCREEN PRINT

Screen printing is a technique that involves using a woven mesh screen that supports an ink-blocking stencil. Ink is transferred through the permeable areas of the woven mesh screen onto a substrate to receive the desired image.

ETCHED PATCH

Create a premium, luxury look and feel using STORMTECH's faux suede and faux leather patches. Laser etched patches are an ideal decoration technique to showcase and elevate your brand artwork on a wide range of apparel, bags, and accessories.
